For Immediate Release

Galil Offers Free Print and Downloadable Versions of 2008 Motion Control Product Catalog

Rocklin, CA—December 12, 2007—Galil Motion Control, an industry pioneer in motion control technology, offers their new product catalog that has been updated for 2008 with comprehensive technical specs and pricing on all their motion controllers and drives. To receive a free 2008 catalog, call Galil at 800-377-6329 or go to <http://www.galilmc.com/products/catalog.html> to download a PDF of the catalog or request a hard copy by mail.

The new 96-page catalog features Galil's popular Ethernet and PCI motion controllers which are available in Econo or Accelera versions. Galil's latest generation Accelera controllers offer the highest speed performance—processing commands 10 times faster than prior generation controllers.

The DMC-40x0 Ethernet/RS232 Accelera box-level controllers are also included in the 2008 catalog along with the DMC-18x6 PCI Accelera card-level controllers. Details are also provided on Galil's very cost-effective Econo series, which includes the DMC-21x3 Econo Ethernet/RS232 controllers and the DMC-18x2 Econo PCI controllers.

Galil's family of multi-axis drives for stepper and servo motors are also covered in the catalog. The DMC-21x3 and DMC-40x0 series combine an Ethernet motion controller with a multi-axis drive in a compact unit. The drives attach directly to the controller without additional cables, providing a solution that minimizes wiring, cost and space.

New to the 2008 catalog is the RIO-47100 Remote I/O controller which provides an intelligent, low-cost and compact solution for I/O. Each intelligent RIO unit contains numerous digital and analog I/O and a RISC processor for fast processing of commands and I/O logic. The RIO includes an Ethernet 10/100Base-T port and RS232 port and can operate as a master or slave device.

Additional entries in the catalog include the new GalilTools software package which includes “one-button” PID tuning and an 8-channel scope for capturing data in real-time. A technical overview about motion control is also featured which provides many programming examples for various modes of motion, including point-to-point positioning, jogging, linear and circular interpolation, contouring and electronic gearing.

For a free hardcopy or downloadable version of Galil’s 2008 catalog, call 800-377-6329 or visit <http://www.galilmc.com/products/catalog.html>. For information about Galil and any of its motion control offerings, contact Lisa Wade, VP-Marketing and Sales, at Galil Motion Control, Inc., 270 Technology Way, Rocklin, CA 95765, Ph. 800-377-6329 or email lisaw@galilmc.com.

About Galil Motion Control, Inc. (www.galilmc.com)

Privately held and profitable for over 87 consecutive quarters, Galil Motion Control, Inc. was founded in 1983 by Jacob Tal and Wayne Baron. Galil became the first company to produce a microprocessor-based servo motor controller without tachometer feedback. Since then, Galil has continued to advance motion control technology and has found industry-leading acceptance with over 500,000 controllers successfully installed worldwide. Various applications include machines for the medical, semiconductor, machine tool, food processing, and textile industries. Recently, Galil has introduced several motion controllers for the Ethernet in addition to the latest generation Accelera controllers designed for ultra high-speed and performance.

Galil offers free new 2008 catalog in hardcopy and downloadable versions.
